PROFILE

Fourth-semester Information Technology student at Universitas Pendidikan Nasional Denpasar with an interest in IT, web development, frontend development, and backend development. Experienced in campus organizations and academic projects, with practical familiarity in JavaScript, PHP, Python, React.js, Express.js, MySQL, and Android development. Adaptive, responsible, and motivated to keep improving technical skills through real projects and collaborative activities.

EDUCATION

Universitas Pendidikan Nasional Denpasar | Denpasar | Bachelor of Information Technology, Faculty of Engineering and Informatics | 2024 - Present

- Fourth-semester student with relevant coursework in Web Programming and Software Engineering.
- Learning focus: Frontend Development, Backend Development, and Web Development.

SMK TI Bali Global Jimbaran | Badung | Multimedia | 2021 - 2024

- Studied multimedia fundamentals, visual design, editing, and digital content creation.

ORGANIZATIONAL EXPERIENCE

Chairman, Information Technology Student Association | Universitas Pendidikan Nasional Denpasar | 2025 - 2026

- Led planning and execution of organizational work programs aligned with activity objectives.
- Coordinated team members in task distribution, internal communication, and responsibility tracking.
- Collaborated with committee members and related stakeholders to ensure activities ran smoothly.
- Supported decision-making, activity evaluation, and preparation of organizational reports.

PROJECTS

HIMA TI Functionary Catalog | Mobile Application | Academic Project

- Developed an Android application to store, search, and manage HIMA TI functionary information.
- Applied MVVM architecture, Kotlin Coroutines, and Room Database for local data management.
- Built responsive UI with RecyclerView and ConstraintLayout; implemented real-time search, A-Z sorting, form validation, error handling, and Logcat logging.

Tech Stack: Kotlin, Android Studio, Room Database, MVVM, Coroutines, RecyclerView, ConstraintLayout, Material UI

Cashier System & Payment | Full-Stack Web Application | Academic/Independent Project

- Developed a web-based cashier system for managing products, carts, transactions, and payments.
- Built the frontend with React and Vite, and created REST APIs using Express.js, Prisma ORM, and MySQL.
- Implemented JWT and bcrypt authentication, ADMIN/KASIR roles, menu CRUD, admin dashboard, transaction history, and Midtrans payment gateway integration.

Tech Stack: React.js, Vite, JavaScript, Tailwind CSS, Express.js, Node.js, Prisma ORM, MySQL, JWT, bcrypt, Midtrans
